PLANT AND SOIL

Contents Volume 289 Nos. 1–2 November 2006

Part I

Role of microbial communities in mediating ecosystem response to disturbance

Guest editor:
Erica A.H. Smithwick

Editorial Notes

Role of microbial communities in mediating ecosystem response to disturbance
E.A.H. Smithwick **1–3**

Soil-mixing effects on inorganic nitrogen production and consumption in forest and shrubland soils
M.S. Booth, J.M. Stark and S.C. Hart **5–15**

Linking soil process and microbial ecology in freshwater wetland ecosystems
J.L.M. Gutknecht, R.M. Goodman and T.C. Balser **17–34**

Responses of soil bacterial and fungal communities to reciprocal transfers of soil between adjacent coniferous forest and meadow vegetation in the Cascade Mountains of Oregon
P.J. Bottomley, R.R. Yarwood, S.A. Kageyama, K.E. Waterstripe, M.A. Williams, K. Cromack Jr and D.D. Myrold **35–45**

Progressive N limitation of plant response to elevated CO_2: a microbiological perspective
S. Hu, C. Tu, X. Chen and J.B. Gruver **47–58**

Bridging the gap between micro - and macro-scale perspectives on the role of microbial communities in global change ecology
T.C. Balser, K.D. McMahon, D. Bart, D. Bronson, D.R. Coyle, N. Craig, M.L. Flores-Mangual, K. Forshay, S.E. Jones, A.E. Kent and A.L. Shade **59–70**

Part II

Regular Articles

Bioengineering of soil profiles in semiarid ecosystems: the 'phytotarium' concept. A review
W.H. Verboom and J.S. Pate **71–102**

Evidence of active biotic influences in pedogenetic processes. Case studies from semiarid ecosystems of south-west Western Australia
W.H. Verboom and J.S. Pate **103–121**

Structural characteristics and plant-beneficial effects of bacteria colonizing the shoots of field grown conventional and genetically modified T4-lysozyme producing potatoes
F. Rasche, E. Marco-Noales, H. Velvis, L.S. van Overbeek, M.M. López, J.D. van Elsas and A. Sessitsch **123–140**

Cover crop effects on the fate of N following soil application of swine manure
T.B. Parkin, T.C. Kaspar and J.W. Singer **141–152**

Recent carbon and nitrogen accumulation and acidification in soils of two Scots pine ecosystems in Southern Germany
J. Prietzel, U. Stetter, H.-J. Klemmt and K.E. Rehfuess **153–170**

Metal complexes increase uptake of Zn and Cu by plants: implications for uptake and deficiency studies in chelator-buffered solutions
F. Degryse, E. Smolders and D.R. Parker **171–185**

Shifts in plant nutrient use strategies under secondary forest succession
E.-R. Yan, X.-H. Wang and J.-J. Huang **187–197**

Release of metals and arsenic from various mine tailings by *Eriophorum angustifolium*
E. Stoltz and M. Greger **199–210**

Relationships between ericaceous vegetation and soil nutrient status in a post-fire *Kalmia angustifolia*-black spruce chronosequence
R.G. Bloom and A.U. Mallik **211–226**

Warming and drought alter soil phosphatase activity and soil P availability in a Mediterranean shrubland
J. Sardans, J. Peñuelas and M. Estiarte **227–238**

Foliar Iron Fertilization of Peach (*Prunus persica* (L.) Batsch): Effects of Iron Compounds, Surfactants and Other Adjuvants
V. Fernández, V.D. Río, J. Abadía and A. Abadía **239–252**

Soil CO_2 efflux in uneven-aged managed forests: temporal patterns following harvest and effects of edaphic heterogeneity
Y. Peng and S.C. Thomas **253–264**

Fertilizer vs. organic matter contributions to nitrogen leaching in cropping systems of the Pampas: ^{15}N application in field lysimeters
S.I. Portela, A.E. Andriulo, M.C. Sasal, B. Mary and E.G. Jobbágy **265–277**

Evaluation of elemental allelopathy in *Acroptilon repens* (L.) DC. (Russian Knapweed)
C. Morris, C.A. Call, T.A. Monaco, P.R. Grossl and S.A. Dewey **279–288**

Ammonium fixation in selected California decomposed granites
D. Rider, D. McGahan and V. Claassen **289–300**

Availability of iodide and iodate to spinach (*Spinacia oleracea* L.) in relation to total iodine in soil solution
J.L. Dai, Y.G. Zhu, Y.Z. Huang, M. Zhang and J.L. Song **301–308**

Assessing short-term responses of prokaryotic communities in bulk and rhizosphere soils to tall fescue endophyte infection
M.B. Jenkins, A.J. Franzluebbers and S.B. Humayoun **309–320**

Influence of microbial activity on plant–microbial competition for organic and inorganic nitrogen
R.M. Dunn, J. Mikola, R. Bol and R.D. Bardgett **321–334**

N_2O, CH_4 and CO_2 emissions from seasonal tropical rainforests and a rubber plantation in Southwest China
C. Werner, X. Zheng, J. Tang, B. Xie, C. Liu, R. Kiese and K. Butterbach-Bahl **335–353**

Enhanced cadmium accumulation in maize roots—the impact of organic acids
F. Han, X. Shan, S. Zhang, B. Wen and G. Owens **355–368**

Growth and ion relations in response to combined salinity and waterlogging in the perennial forage legumes *Lotus corniculatus* and *Lotus tenuis*
N.L. Teakle, D. Real and T.D. Colmer **369–383**
